

## Meeting Minutes Taken on 19<sup>th</sup> May, 2008 at 1500 hours

**Attendees:** David, Ken, Hill, Hemant & Jon

**Excused:** Sahil

**Next Meeting:** 26/05/2008 (Monday) @ 1500 hours

### **Contents:**

#### 1. Progress & ARs Updates

- Database studies
  - Hemant now joins Hill this tasks, and Sahil is relieved from it.
  - Hill explained his mistakes about the 'rgt' and 'lft' columns found in the 'directories' table.
  - Hill said that he is currently looking at the usages of the tables and will have the first public draft by 23/5/2008 presented.
- Ticket 27
  - NTU
- Ticket 66
  - Ken explained that it was completed in Milestone 1, and now is corrected and tested with no problems
  - It was found out that the errors found during unit testing was caused by missed commits, which allowed bogus codes to be populated into the repo.
  - Also, rcov detected that the current unit test scripts do not cover only 2 lines of newly introduced codes. Ken explained that those two lines has a very low chance of being executed as they are only ran during the initial pass.
- Ticket 23
  - Jon presented his draft of the design of how will the tagging mechanism works.
  - An initial prototype is also presented.
  - A concern was raised that what Jon is doing is very similar to another subgroup's task. However, the decision is to get it done and presented on 23/5/2008 and settle the overlaps then.
- Plans and alignments for Milestone 1 & 2
  - Ken said that all the plans and alignments are currently in the repo for anyone's perusal.
  - Ken briefly explained that he is currently using the plans to track the subgroup's resources and commented that so far the resources are not properly used. Moving forward, he hope to have it better planned for Milestone 3.

## 2. Plans moving forward

- Integration testing on current worked tickets
  - The group is planning to have all Tickets 27, 66 and 23 be integrated by 23/5/2008.
  - This should coincide with the group's full integration.
- Milestone 3 deliverables
  - Not discussed due to unavailability of 'pre-flight' master plan.
  - David suggested to have it discussed during 23/5/2008 presentation day.

## 3. Recognitions & Opens

- None.

## 4. ARs

- Jian Huang & Hemant needs to present the first public draft of the database document. (Due: 23/05/2008)
- Jon to complete the first prototype of Ticket 23 (Due: 21/05/2008)
- Sahil to find out how to properly test ticket 27 (Due: 21/05/2008)
