

## Meeting Minutes Taken on 7<sup>th</sup> October, 2008 at 1300 hours

---

**Attendees:** Huang Jian, Cui, Fil, Ken, Keane, Ida, Li Jiang & David

**Late:** Mohammad

**Next Meeting:** 14/10/2008 (Tuesday) @ 1300 hours

### Contents:

1. Progress updates
  - Ida
    - Daemon installation script has been updated
    - Uninstall script has been introduced
  - Ken
    - Introduced `list_plugins` script to list currently installed plugins
    - Introduced `earth_plugins` script as the unified daemon plugins manager
  - Fil
    - Daemon status can now be viewed in the browser instead of having to type the `status` command through a daemon plugin.
  - Mohammad
    - File metadata extension point is currently being developed.
  - GUI plugin
    - Xiaodong, Keane and Huang Jian briefed and demoed their functional plugins for GUI.
2. What's next?
  - Cleanup all the scripts and codes to be integrated. Have them unit tested and prepared for integration in the coming sprint.
  - David suggested to perform a performance benchmarking to see whether the new changes has any significance to the original version.
  - David is expecting detail reports on the plugins architecture and present the ways investigated on GUI plugins.
  - Ken suggested that integration should be done as a full group instead of subgroups. This because he had experienced the issues with merging using `git`.
