Meeting Minutes Taken on 14th May, 2008 at 1500 hours

Attendees: David, Ken, Hill, Sahil & Jon

Absent: Hemant

Next Meeting: 19/05/2008 (Monday) @ 1500 hours

Contents:

1. Progress Update
   - Earth installation
     - So far everyone got it installed on their own personal machines. However, due to unexpected hardware failures, it is slowing progress down.
     - The members who are facing such problems are currently working on it and committed to get their work done by end of this week.
   - Database studies
     - Sahil & Jian Huang presented the first draft of ERD
     - David suggested that for the second draft, we should be looking closer into the usage of the schema and have them documented.
     - David also suggested for us to start on building a Data Dictionary.
   - Ticket 27
     - Due to unexpected hardware failure, the ticket is currently redone by Sahil.
   - Ticket 66
     - Ken is currently looking at how to test this ticket.
   - Ticket 23
     - Jon presented the data structure of the tagging mechanism.
     - David suggested to post a question on Trac to clear up the confusion between normal tagging and RSP convention tagging from metadata.

2. Plans moving forward
   - Testing and Test Coverage
     - Ken is currently looking at both. He is also trying to find out how to test Ticket 66.
     - Sahil will look at testing for Ticket 27.
     - Jon will look at testing for Ticket 23.
   - Synching of git repo
     - Subgroup 3 git repo has been created and made public.
     - All members can now clone the repo and push and pull updates.

3. Opens

   - David re-assured the special purpose machines will be setup ASAP.

4. ARs

   - Jian Huang will come up with the 2nd draft of the database document. (Due: 21/05/2008)
   - Ken to find out how to properly test ticket 66 (Due: 19/05/2008)
   - Jon to complete the first prototype of Ticket 23 (Due: 21/05/2008)
   - Sahil to find out how to properly test ticket 27 (Due: 19/05/2008)
