Individual Milestone 7 Report

Executive Summary

This milestone was the final milestone for the Earth project. The first task for this milestone was completing and polishing, so that all the functionalities were implemented properly. The second task is integtation and finishing all the documentation. Finally we prepared for the final presentation.

Tasks and Activities Assigned

-
  - Finishing the uninstall script with depandencies
    * Description: Finishing the functionality of uninstall script with all the dependcies. It means that when a plungin is removed,all its child-plugins and the related extension point should be removed at the same time.
    * Affected files: `earth/lib/Earth_plugin_interface/plugin_meneger`
    * time taken (planned): 16 hours
    * time taken (actual): 14 hours

-
  - retesting all the functionalities
    * Description: I tested all the functionalities that I have implemented so far and making sure everything is proper before integratin.
    * time taken (planned): 15 hours
    * time taken (actual): 15 hours

- Writing comments for all the code that I have written so far.
  - Description: I wrorte comment for the code that I added to clarify what the code means and how it works, so that other developers will work on it easier.
  - time taken (actual): 15 hour

- Preparing for the final presentation
  - Description: We had meeting for the final presentation, everyone was assigned to present a part related to his/her work. I was assigned to present the part about the installation of deamon plugin.
  - time taken (actual): 8 hoursd

Resource Contributions

For this milestone, I have estimated that I had spend about 60 hours (including the meeting hours) over the spread of 3 weeks.
